To Whom it May Concern:

This is a letter of recommendation for Precision Heavy Haul, Inc. I have had a business relationship with Mike Poppe that goes back over 25 years. When Mike started with his first truck sometime around the mid 1980's, I was working for Williams Southwest, which is now Road Machinery. We were the new Komatsu dealer in Tempe and did not own any trucks of our own. We had to contract out all of our trucking. Precision soon became our first and only call because they were always on time. They also picked up and delivered our equipment in exactly the right spot.

As Mike's company has grown over the years, he has been able to maintain this high level of customer service and excellence. At Road Machinery today, we use Precision Heavy Haul, Inc for all of our heavy hauling needs. We have found, over the years, that Precision is one of the very few heavy haul firms in operation that has the right insurance in place at all times, the best knowledge of state and local laws, and most important, they deliver as promise each and every time.

I cannot say enough about the highest level of performance we have received from them over a long period of time. To us making on time deliveries to our customer base is much more important than a cut rate from someone with a broken down truck and improper insurance.

If you want first class service, just call Precision Heavy Haul!

Sincerely,

Terry Yochum
